

GOPIKA NAIR J

AI/ML Engineer

Kerala, India | +91 9961665142

| nairigopika@gmail.com

| [LinkedIn](#)

Objective

Passionate Computer Science Engineer with hands-on experience in AI/ML development, LLM-powered applications, and data analytics. Skilled in Python, deep learning frameworks, NLP, and modern Gen AI tools, eager to contribute to intelligent enterprise solutions.

Experience

Junior Generative AI Engineer | Raabyt

Present

- Developing agentic AI features for an on-premise ERP system including a conversational chat interface, automated report generator, and AI review assistant using LangGraph and LLMs.
- Building and integrating ML models for classification, forecasting, and anomaly detection into ERP workflows to support business decision-making.

Data Analytics Trainee | MedTourEasy

Sep 2025

- Completed a one-month Data Analyst traineeship at MedTourEasy, gaining hands-on experience in data analysis.
- Developed a machine learning model using Python, Pandas, and TPOT to forecast blood donation behavior from donor data.

Education

College of Engineering Adoor

May 2025

BTech in Computer Science & Engineering | CGPA: 7.8

Govt. TDHSS, Alappuzha

Mar 2021

Higher Secondary Education | 98.33%

Skills

- Gen AI & LLM** – RAG, LangChain, LangGraph, AI Agents, Prompt Engineering, Embeddings, Vector DBs
- ML & Deep Learning** – Python, Machine Learning, NLP, Deep Learning, PyTorch, Scikit-learn
- APIs & Dev Tools** – FastAPI, Git, AI Coding Assistants
- Data & Analytics** – SQL, Pandas, NumPy, Tableau
- Soft Skills** - Communication, Leadership, Creativity, Presentation Skills, Analytical Skills, Management

Projects

Smart Travel Planner: Agentic AI Workflow

April 2026

- Built an Agentic AI Smart Travel Planner using FastAPI, LangGraph, and Gemma (Ollama) for intelligent travel query processing.
- Integrated weather, places, and route APIs to provide real-time travel recommendations through a Streamlit UI.

Mini RAG System

Dec 2025

- Built a Mini Retrieval Augmented Generation (RAG) system that processes PDF documents, generates semantic embeddings using all-MiniLM-L6-v2, stores them in ChromaDB, and retrieves relevant context for accurate question answering.
- Integrated Groq Llama 3.1 (8B Instant) with LangChain to build a low-latency, retrieval-based QA system.

DeepHire: AI Driven Interview Analysis with Real Time Interaction

April 2025

- A real-time AI based mock interview platform developed as a part of my major project.
- It incorporates Gemini AI for question generation and answer evaluation, DeepFace for emotion recognition and spaCy for fluency detection.

Certifications

- Coursera - IBM Generative AI Engineering
- Coursera - Google Data Analytics
- Coursera - Foundations of Data Science
- Coursera - Google Get Started with Python

Volunteering

- Senior Mentor, KLM-PTA Region, Natural Resource and Protection Force (2024-2025)
- Associate Volunteer Secretary, National Service Scheme, CEA (2023-2024)
- Secretary, IEEE Student Branch, CEA (2023-2024)
